

ROUND2 INC. ENDORSES THE ENVIRONMENTAL PROTECTION AGENCY'S RESPONSIBLE RECYCLING ("R2") PRACTICES

R2 POLICIES PROMOTE E-WASTE REUSE AND MATERIAL RECOVERY

AUSTIN, TEXAS, MAY 04, 2009 -- ROUND2 INC. today announced its endorsement of the EPA's Responsible Recycling (R2) Practices. The R2 Practices detail a set of voluntary guidelines and principles for electronic recyclers, covering topics such as reuse, reclamation, disassembly and disposal. ROUND2's support of the R2 Practices highlights its absolute commitment to responsible recycling of all commodities.

ROUND2 chose to endorse the R2 Practices to emphasize its focus on reuse as the primary form of recycling. According to the R2 Practices, the hierarchy of responsible electronics management strategies is first reuse, then materials recovery and finally energy recovery or disposal.

Randy Weiss, ROUND2's co-founder and President, said, "ROUND2 was created to deliver closed loop solutions for processing end of life material. We believe our client-centric solutions adhere to the R2 hierarchy of recycling. Our voluntary support of the R2 Practices illustrates our dedication to comply with the highest industry standards."

Weiss continued, "The R2 Practices hold electronics recyclers to strict standards and ROUND2 believes these guidelines will form the cornerstone of upcoming legislation for the recycling industry. By endorsing the R2 Practices, ROUND2 is proactively engaged in the future of responsible recycling. The R2 Practices are a market differentiator."

The R2 Practices are commercially and governmentally accepted offering accredited certification of electronics recyclers. Recently, the Institute of Scrap Recycling Industries (ISRI), the voice of the recycling industry, stated that it will incorporate the R2 Practices in its Recycling Industry Standard (RIOS) certification program.

About ROUND2 INC.

ROUND2 INC. is committed to delivering vertically integrated, recycling and reuse solutions for large volume technology processors of post-consumer electronics, paper, and plastics. Additionally, ROUND2 offers Asset Management Services, CRT Recycling, and Certified Data Destruction in a 100% environmentally compliant manner.
