

ROUND2 INC. EXPANDS RECYCLING FACILITY IN OHIO

NEW FACILITY WILL INCREASE CAPACITY 300%

AUSTIN, Texas – August 12, 2010 - ROUND2 INC. announced today a move to a larger facility in Grove City, Ohio. The new facility at 3180 Urbancrest Industrial Drive has 104,000 square feet dedicated to processing and recycling end-of-life electronics. The expansion allows ROUND2 to increase capacity and deliver its innovative services to the fast-growing Ohio Valley market. The facility is expected to process in excess of 5MM pounds of material per month.

“Moving to this facility not only demonstrates our continued commitment to our growing client base, but also to the people and city administrators of our partner, Grove City. As ROUND2 continues its national expansion, it’s important to make sure that our existing facilities grow to meet client and market needs,” said Paul Adamson, ROUND2’s VP of Corporate Development.

ROUND2 has additional processing facilities in Coppell and Austin, Texas, totaling 166,000 square feet that encompass the Corporate Headquarters, a Technical Operations Center, as well as, end-of-life processing services.

ROUND2 INC. is a leading eRecycling service provider offering a wide range of integrated asset disposition and technology recovery solutions. ROUND2’s revenue-based recycling services allow clients to better manage their end-of-life asset retirement process, technology rotation and data security requirements, while maximizing economic returns. ROUND2 is an ISO 9001: 2008, ISO 14001: 2004, and OHSAS 18001: 2007 registered company.
